

Filtering air

Quizz and FAQ

1) What is the Index that measures air quality?

- The Air Quality Index (AQI)
- The Oxygen Quality Measure (OQM)
- The Air Level Index (ALI)

2) Air pollution changes the air characteristics of the atmosphere. What types of agents influence the atmosphere?

- Chemical agents such as hydrocarbons
- Physical agents such as carbonaceous
- Biological pollutants
- All of the above

3) Are the primary sources of pollution human made or natural?

4) What are the three layer of a good air filtration system?

- Pre-filter, HEPA filter, carbon layer
- HEPA filter, carbon layer, deep layer
- Air filter, carbon filter, oxygen filter

5) What is the most effective mask against pollution?

- FFP1
- FFP2
- FFP3

Answers

1) What is the Index that measures air quality?

- The Air Quality Index (AQI)

2) Air pollution changes the air characteristics of the atmosphere.
What types of agents influence the atmosphere?

- All of the above

3) The primary sources of pollution are human made

4) What are the three layer of a good air filtration system?

- Pre-filter, HEPA filter, carbon layer

5) What is the most effective mask against pollution?

- FFP3
